N-E-D's Early Entry *Elite* Blades and Shields: the new industry standard

- Square arbor design fits SOFF-CUT®* early entry saws without adaptors.
- N-E-D's patent-pending Shield – included free with each blade – helps ensure a perfect cut with less spalling.

How does it work? For each blade, the operator snaps a new N-E-D Shield onto the skid-plate. When the saw starts, the Elite blade cuts a slot through the thin high-density-plastic Shield. Since the opening in the Shield is only as large as the blade itself, the concrete directly adjacent to the cut is protected by the Shield from spalling. The N-E-D Shield is quickly becoming an industry standard in early-entry sawing.

- Elite bonds use the highest quality materials, are well tested, and are based on years of early entry sawing experience.
- Color coded blades available in all sizes for all aggregates.

N-E-D	Soff Cut®	AGGREGATE
BLACK	N/A	ULTRA HARD
GREEN	GREEN	VERY HARD
ORANGE	RED	HARD
WHITE	YELLOW	MEDIUM
PURPLE	BLUE	SOFT
